DISCUSSION AGENDA

1. Stormwater Utility Fees

Mike McMeekin with the Town's contract engineering firm, Lamp Rynearson discussed and presented a Power Point presentation regarding the Stormwater Utility Study. He explained what other community's in the area charge for residential properties and that those rates range from \$3.00 per residential lot to \$10.00 per residential lot. He also explained the fee's associated with non-residential lots and how those fees are determined. McMeekin explained that the determination on these lots are based on impervious areas. The fee is typically the same for all single family residential and the fee for non-single family is based on a rate determined by the impervious area. The reasoning for this is there is less non-single family properties in order to determine what the impervious areas are and it's more efficient for staff to provide this cost based on size, than to try and do this for single family residences.

Trustee Jemiola would prefer a flat rate for all non-single family properties. Town Administrator Brown explained that there are a couple of small businesses in Town that would be paying the same fee as the large businesses in Town.

Discussion from the Board was to continue discussion on the fee at a later date.

2. Resolution of Support for Improvements to Interstate 25 (I-25)

Mayor Tokunaga presented a draft resolution in support of improvements to the I-25 corridor and spoke to the Town Board about the need for improvements to Interstate 25. The Mayor explained the lack of funding for this project.
