

NOTICE TO RESIDENTS, BUSINESS OWNERS, AND TENANTS

Insituform Technologies, LLC and Nelson Pipeline LLC have been contracted by the Town of Milliken to perform the 2015 Sanitary Sewer Rehabilitation Project. This work will consist of replacing the existing sanitary sewer and street reconstruction in your area. The construction zone for this work is depicted by the red boxes shown in Figure 1.

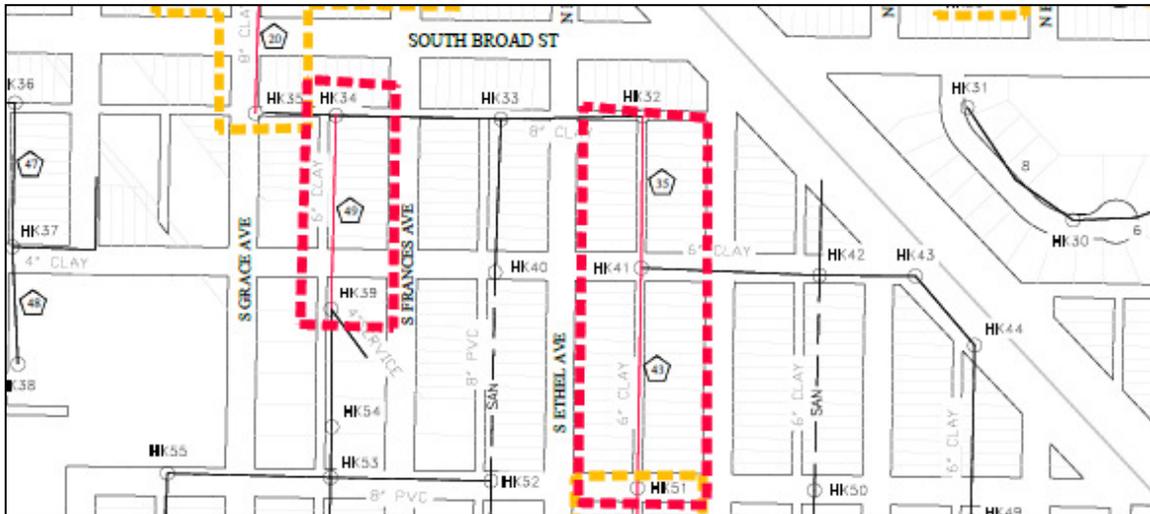

Figure 1: Sewer Excavation Construction Zone

The work will begin on, or about, about January 18th, 2016 and will continue approximately through the end of February. Hours of work will generally be from 7:00am to 5:00pm. While the construction is ongoing, the work area will be closed to through traffic during working hours. As the sewer replacement progresses, each residence will be asked to limit their use of water (i.e. showers, dishwasher, washing machine, etc.) during the working day that your service line is being disconnected and reconnected. You will be notified of the day or days to expect limited use of your sewer service. All service connections will be returned to a working state at the end of each working day.

If you have questions, please communicate with Nelson Pipeline LLC or Insituform Technologies, LLC (as indicated below). While our first priority is to complete the work, we will gladly take a moment to keep you informed.

Contacts for the project are as follows:

Nelson Pipeline LLC

Project Manager: Ignacio Martinez - 303-549-750
Superintendent: Pat Auker – 303-921-0804

Insituform Technologies, LLC

Project Manager: Eric Huss – 303-512-3523
Field Engineer: Rich Steffen – 720-668-2389

Sincerely,

INSITUFORM TECHNOLOGIES, LLC
